

COMPANY BROCHURE

Inorganic products trading

Inorganic salts held to a stated grade: sulphates of ammonium, magnesium, iron, sodium and zinc, plus potassium and ammonium chloride. Quoted against your specification and despatched in bulk from the Ankleshwar chemical belt.

OUR PRODUCTS

 Ammonium Sulphate $(\text{NH}_4)_2\text{SO}_4$	 Magnesium Sulphate MgSO_4	 Ferrous Sulphate FeSO_4	 Sodium Sulphate Na_2SO_4
 Zinc Sulphate ZnSO_4	 Potassium Chloride KCl	 Ammonium Chloride NH_4Cl	07 INORGANIC SALTS IN STOCK

01 — WHO WE ARE

An inorganic chemical trading desk in the Ankleshwar belt

INORGIX Chemical Solutions trades inorganic chemical salts. We buy from producers in and around the Ankleshwar belt and sell to industrial processors, fertilizer blenders, water treatment operators and manufacturers who order by the tonne.

07

INORGANIC SALTS

25–1000 kg

PACKAGING RANGE

COA & SDS

WITH EVERY BATCH

Ankleshwar

SOURCING HUB

Every enquiry is answered with a grade, a price and a lead time. We qualify each supply partner on assay and moisture consistency before the material is offered, because a shifting specification costs a buyer more than the discount that came with it.

Most of our volume is repeat business. Orders are packed to the size the receiving plant actually handles, from 25 kg bags to jumbo bags and bulk, and every consignment carries its certificate of analysis.

01**How we source**

Producers qualified on assay and moisture consistency before any material is offered.

02**How we quote**

Grade, price and lead time on every enquiry, with COA and SDS on request.

03**How we ship**

25 kg bags to jumbo bags and bulk, packed to the plant's handling size.

OUR VISION

To be the desk a buyer calls first when the grade matters and the delivery date is fixed.

OUR MISSION

To quote honestly, ship on the agreed date and document what is in the bag, order after order.

01

Ammonium Sulphate

 $(\text{NH}_4)_2\text{SO}_4$ · CAS 7783-20-2

Carries 21% nitrogen and 24% sulphur in one salt, which is why it suits alkaline soils where urea alone underperforms. The same material works as an intermediate in water treatment and textile processing.

PURITY	FORMS	APPEARANCE	GRADES
≥ 98.5% min	Dry, Moisture, Granular	White / off-white crystals	Industrial, Agricultural

APPLICATIONS Fertilizer blending & agricultural nutrition

Water treatment & fireproofing

Industrial & chemical manufacturing

Textile dyeing and leather tanning

PACKAGING 25 kg / 50 kg bags, jumbo bags, bulk — on request · COA and SDS supplied per batch

02

Magnesium Sulphate

 MgSO_4 · CAS 7487-88-9

Dissolves readily, so it can be applied through fertigation as easily as it is blended dry. Supplied as heptahydrate or anhydrous depending on whether you are feeding crops, livestock or a process line.

PURITY	FORMS	APPEARANCE	GRADES
≥ 99.0% min	Dry, Moisture, Granular	Colourless / white crystals	Technical, Agricultural, Heptahydrate & Anhydrous

APPLICATIONS Soil fertility correction & fertigation

Pulp & paper bleaching additive

Water treatment & effluent conditioning

Textile, leather and detergent manufacturing

PACKAGING 25 kg / 50 kg bags, jumbo bags, bulk — on request · COA and SDS supplied per batch

03

Ferrous Sulphate

 FeSO_4 · CAS 7720-78-7

A coagulant and reducing agent. It drops phosphates and chromates out of effluent, corrects iron chlorosis in soil, and reduces hexavalent chromium in cement. Iron content runs 19–30% depending on the hydrate.

PURITY	FORMS	APPEARANCE	GRADES
≥ 98.0% min	Standard, Crystalline, Powder	Blue-green crystals / green powder	Industrial, Heptahydrate, Monohydrate

APPLICATIONS Effluent and wastewater coagulation

Cement hexavalent chromium reduction

Iron deficiency treatment in soil

Iron oxide pigment raw material

PACKAGING 25 kg / 50 kg bags, jumbo bags, bulk — on request · Moisture-sealed packing available

04

Sodium Sulphate

 Na_2SO_4 · CAS 7757-82-6

Chemically inert and neutral in pH, which is what makes it the standard filler in detergent powder. The same anhydrous grade works as a fining agent in glass furnaces and as cooking liquor make-up in kraft pulping.

PURITY	FORMS	APPEARANCE	GRADES
≥ 99.0% min	Standard, Fine Powder, Granular	White crystalline powder	Detergent, Technical (Anhydrous)

APPLICATIONS Detergent powder & cleaning formulation filler

Glass fining & bubble elimination

Kraft pulp & paper cooking liquor

Textile dyeing levelling agent

PACKAGING 25 kg / 50 kg bags, jumbo bags, bulk — on request · COA and SDS supplied per batch

05

Zinc Sulphate

 ZnSO_4 · CAS 7733-02-0

Water-soluble zinc at 21–35%, applied to correct deficiency and support root development. Industrially it goes into rayon coagulant baths, electroplating electrolytes and flotation circuits.

PURITY	FORMS	APPEARANCE	GRADES
≥ 98.0% min	Standard, Free-flowing crystals, Powder	White crystalline / granular	Agricultural micronutrient, Industrial

APPLICATIONS Foliar & soil micronutrient fertilizer

Rayon spinning and textile coagulant bath

Animal feed mineral fortifier

Mineral flotation and electroplating

PACKAGING 25 kg / 50 kg bags, jumbo bags, bulk — on request · COA and SDS supplied per batch

06

Potassium Chloride

 KCl · CAS 7447-40-7

The standard potassium carrier for fertilizer blends, and a shale inhibitor in drilling fluid. Available as MOP for agriculture or industrial grade for chemical manufacture.

FORMULA	FORMS	CAS NUMBER	GRADES
KCl	Standard, Crystalline, Granular	7447-40-7	Industrial, Agricultural MOP

APPLICATIONS Fertilizer manufacturing & crop nutrition

Chemical manufacturing feedstock

Oil & gas drilling fluid shale inhibitor

Industrial process applications

PACKAGING 25 kg / 50 kg bags, jumbo bags, bulk — on request · COA and SDS supplied per batch

07

Ammonium Chloride

 NH_4Cl · CAS 12125-02-9

A flux chemical: it strips oxide from steel ahead of hot-dip galvanizing and soldering. Also used in dry-cell battery electrolyte and as a dyeing auxiliary.

FORMULA

 NH_4Cl

FORMS

Standard,
White powder,
Crystalline

CAS NUMBER

12125-02-9

GRADES

Industrial /
Technical

APPLICATIONS

Hot-dip galvanizing and soldering flux

Textile dyeing auxiliaries

Dry-cell battery electrolyte

General industrial processing

PACKAGING 25 kg / 50 kg bags, jumbo bags, bulk — on request · COA and SDS supplied per batch

QUALITY & DOCUMENTATION

Purity, moisture and particle size decide your process

Certificate of Analysis

Issued per batch with assay, moisture and the impurity limits that matter for your process.

Safety Data Sheet compliance

Supplied up front so your handling, storage and transport paperwork is complete before the truck arrives.

Moisture-proof packaging

25 kg and 50 kg bags, jumbo bags or bulk, with barrier liners where the salt is hygroscopic.

Ankleshwar hub logistics

Sourcing and despatch from Gujarat, which keeps freight short and lead times predictable.

02 — COMMERCIAL CAPABILITY

Why choose INORGIX

01

Reliable sourcing

Supply partners are qualified on consistency before we offer their material, and we hold more than one source for each salt.

02

Quality-oriented approach

We quote a specification, not a product name, and the certificate of analysis has to match it batch after batch.

03

Competitive commercials

Pricing moves with tonnage and packing, and we will say so rather than quote a flat number that suits us.

04

Flexible packaging

25 kg bags, 50 kg bags, jumbo bags or bulk, packed to what your receiving bay and storage can actually handle.

05

Bulk supply capability

Regular volumes for processors, blenders and distributors, with repeat schedules held against agreed dates.

06

Responsive service

Enquiries are answered within one working day, by someone who can confirm grade, price and despatch.

START WITH A SPECIFICATION

Tell us the grade and tonnage

Send the salt, the grade, the tonnage and how you need it packed. You get availability, a price and a despatch date back, with the certificate of analysis and safety data sheet attached.
